Rule 424 Windstorm Mitigation Program Forms HO-2 and HO-3

A. Eligibility

- 1. The provisions of this rule do not apply if the policy excludes the perils of Windstorm and Hail.
- 2. With respect to a residential dwelling, to obtain a premium credit for this program, the insured property must be certified as:
 - a. Constructed in accordance with the 2006 International Residential Code, as amended, including all hurricane mitigation construction requirements, or
 - **b.** Constructed in accordance with the Fortified For Safe Living Standards (FFSLS) as adopted by the Institute for Business and Home Safety.
 - c. Retrofitted to Level One, Level Two, or Level Three, as defined in the Fortified Existing Homes requirements as adopted by the Institute for Business and Home Safety

B. Proof of Compliance

The insured must submit proof of the required certification. Acceptable forms of proof include either:

- Mitigation Verification Affidavit (PL-14868) completed by a certified or licensed building inspector certifying conformity to the applicable building code including all hurricane mitigation construction requirements; or
- 2. Inspection and certification by an FFSLS certified inspector as new construction in accordance with the Fortified For Safe Living Standards or Retrofit Level One, Two, or Three.

The insured is responsible for the expense associated with substantiating the installation of the windstorm loss mitigation features.

Refer to Rule 301.A.4 table in the Rate section of the manual for applicable factors.

MISSISSIPPI QUANTUM HOMEOWNERS

THE TRAVELERS HOME AND MARINE INSURANCE COMPANY TRAVELERS PERSONAL SECURITY INSURANCE COMPANY

Rule 301 Premium Calculation

Rule 301 Premium Calculation

- A. Premiums for all forms are developed from statewide premium for certain, individual perils. Each premium is then adjusted by factors, resulting in a premium for that peril that reflects the characteristics of the specific exposure. After all factors have been applied, all peril premiums are added together to produce the combined peril premium. The Total Policy Premium is determined by adding any premiums for additional coverages and endorsements that are not rated in the peril premiums to the combined peril premium.
 - From the base premium table, select the base premium for each peril as shown for the applicable company in which the policy is to be issued.
 - 2. From the Territorial Relativity Table, select factors for each peril in the applicable company.
 - 3. From the Tier Factor Table, select factors for each peril in the applicable company.
 - 4. From the Rule 301.A.4 rate pages, select factors for each peril based on the construction, protection class and other risk characteristics, as applicable. See Rule 400-410, and 424.
 - From the Rule 301.A.5 rate pages, select factors for each peril based on the appropriate risk characteristics, as applicable. See Rule 415-420.
 - From the tables for Rule 301.A.6 rate tables, select factors for each peril for all coverages and increased limits that apply.
 - From the Rule 301.A.7 rate pages, select factors for each peril based on the combination of other policies in force for the applicant/insured with Travelers. See Rule 425.
 - **8.** From the Rule 301.A.8 rate pages, select factors for each peril from each of the following tables:
 - a. Company Deviation (see Rule 426)
 - b. Association Discount Program (see Rule 428)
 - c. Miles to Fire Department (see Rule 429)
 - 9. Multiply each peril base rate by the peril specific factors that were selected in steps 2. through 8. above.
 - 10. Calculate the Peril Expense Allocation based on the company, form and expected policy longevity using the tables in Rule 301.A.10 rate pages. Distribute the total expense allocation amount to the individual perils based on the ratio of each individual peril premium to the combined premium for all perils. See Rule 701.
 - 11. Add the results from step 10. to the results in step 9. for each peril.
 - 12. Multiply the results in step 11. by the factor for each peril in the Transition Modification Factor Table. Round the result for each peril to the nearest cent. (Round \$.005 or more up to the next whole cent.)
 - 13. Add the results in step 12. for all perils and round to the nearest dollar. (Round \$.50 or more up to the next whole dollar.) The result is the combined peril premium.
 - **14.** Multiply the premium for each non-peril rated additional coverage by the Transition Modification Factor and round to the nearest whole dollar.
 - 15. Add the rounded premium developed in step 13 to the premium developed in step 14 excluding valuable ltems PLUS, Identity Fraud Expense Reimbursement Coverage, Personal Liability Supplement, and Earthquake
