MID Releases Clarity Act Data Call

(Jackson)- Commissioner of Insurance Mike Chaney today announced the release of the data call and analysis initiated by the Mississippi Insurance Department and supplemented by the requirements of House Bill 739, also known as the Clarity Act.

The Clarity Act allows the Commissioner of Insurance to collect and analyze certain premium and loss information by zip code for homeowners insurance in Mississippi. This data is reported in three policy categories, including homeowners policies that include windstorm coverage; homeowners policies that exclude windstorm coverage; and all policies that only include windstorm coverage.

The data and analysis is available for viewing on the MID website at www.mid.ms.gov.
