**Rule 6.04: Rule**

2. a mortality table which is of the same blend as used in (i) but applied to form a blend of the 1980 CET Table (M) and the 1980 CET Table (F) may at the option of the company be substituted for the 1980 CET Table for use in determining minimum cash surrender values and amounts of paid-up nonforfeiture benefits.

Tables 1 and 7 are not to be used with respect to policies issued on or after January 1, 1985, except where the proportion of persons insured is anticipated to be 90% or more of one sex or the other or except for certain policies converted from group insurance. Such group conversions issued on or after January 1, 1986 must use Mortality Tables based on the blend of lives by sex expected for such policies if such group conversions are considered as extensions of the Norris decision. This consideration has not been clearly defined by court or legislative action in all jurisdictions. The values of 1000 q<sub>x</sub> for blended Tables 2, 3, 4, 5 and 6 are shown in Appendix I. The letter of Appendix II states the method by which selection factors may be obtained. Table 1 is the same as 1980 CSO Table (M) and 1980 CET Table (M) and Table 7 is the same as 1980 CSO Table (F) and 1980 CET Table (F).
