myHOME Scr.APP.bk

Android Application
User's Quick Guide

A home inventory can be invaluable when deciding how much insurance coverage fits your life situation, and makes sure you are adequately protected should you need to file a claim.
**NOW THERE'S AN *ANDROID* APP FOR THAT!**
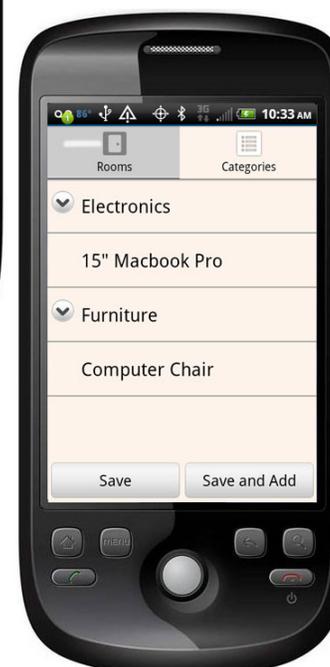

1. Launch App

2. Add Item

Take photos of your item, then add details: name, room, category, date of purchase, price, serial number, then "Save." To add more items, click "Save and Add."

ADD ITEM

Item Name:
15" Macbook Pro

Room:
Computer Room

Category:
Electronics

Save   Save and Add

3. Edit Item List/Rooms

The app organizes items by categories ("Item List") and by "Rooms."

ITEM LIST   ROOMS

Rooms   Categories

Electronics

15" Macbook Pro

Furniture

Computer Chair

Save   Save and Add

5. Email a .csv file backup

Tap the "Export Report" icon to send yourself the inventory by email or Gmail. The attached .csv file will open in most spreadsheet applications such as Excel.

6. Tips and Resources

The app connects to online resources from the NAIC to help you *get smart about insurance.*
