MISSISSIPPI LAWS

§ 75-57-33. Installing and charging cylinders.

No cylinder installation shall be made unless the cylinders are designed, fabricated, tested and marked in accordance with the regulations of the United States Department of Transportation or the United States Interstate Commerce Commission, and constructed for a designed pressure of not less than two hundred forty (240) pounds per square inch. Cylinders with a water capacity of less than two hundred fifty (250) pounds shall be charged by weight with liquefied petroleum gas only at bulk storage or cylinder filling plants and not from mobile units such as delivery trucks, except cylinders installed as part of a system burning liquefied petroleum gas or compressed natural gas as a motor fuel or for farming purposes such as in flame cultivators or hot air balloon cylinders. Cylinders with a water capacity of two hundred fifty (250) pounds or larger may be charged at the installation from mobile units, provided they are equipped with a fixed liquid level gauging device and a filling valve, which is designed in accordance with the national standards and codes, in addition to other required or acceptable valves and fittings. Cylinders with a water capacity of two hundred fifty (250) pounds or larger, in addition to having all the necessary valves and fittings, must be installed permanently in accordance with the national standard and codes.

§ 75-57-47. Installation of systems, etc.; inspection; correction of installations, etc.; certificates and permits; remedies for violations.

- (1) From and after the effective date of this chapter, any installer or other person who shall install, connect, alter, extend, change or repair any liquefied compressed gas or compressed natural gas system, container or appliance whatsoever, or who shall install, connect, change, extend, alter or repair any piping or fitting connected with or attached to any liquefied compressed gas or compressed natural gas container, system or appliance shall, within fifteen (15) days after the completion thereof, give notice to the State Liquefied Compressed Gas Board, in writing, on forms to be provided by the State Liquefied Compressed Gas Board, that such installation, connection, alteration, extension, change or repair has been made, which notice shall give full details with reference thereto, and shall give the name of the person at whose order same was made, and the name of the installer, as provided in this chapter, under whose supervision the installation, alteration, etc., was made and the address of the premises upon which same was made. Any person who shall install, connect, alter, extend, change or repair any liquefied compressed gas or compressed natural gas system, container or appliance, or any piping or fitting connected or attached thereto, without giving notice to the State Liquefied Compressed Gas Board as provided herein shall be subject to the sanctions set out in this chapter.
- (2) Upon receiving notice of any installation of a liquefied compressed gas system or natural gas fueling system other than a liquefied petroleum gas carburetion system, it shall be at the discretion of the Commissioner of Insurance to cause same to be inspected, and if he or she approves same after such inspection, he or she shall leave upon such premises a written certificate of approval. Upon receiving notice of any connection, alteration, extension, change or repair to any system required to be inspected at the time of installation under the provisions of this subsection, the Commissioner of Insurance may cause the system to be inspected if he or she believes that sufficient change or repair has been made so as to alter the system from its original installation. If, after such inspection, the inspector finds that the installation or repair has not been properly made, he or she shall report such fact to the distributor or installer making the installation and request that corrections be made within seventy-two (72) hours after the time of such inspection, if the defects are such that can be corrected without the necessity of condemning the entire system. Any distributor or installer who fails or refuses to make the corrections after requested so to do by the inspector, after a hearing before the State Liquefied Compressed Gas Board, may have his authority or certificate of compliance suspended or revoked.

Installers, as defined in this chapter, are hereby authorized to issue temporary certificates of approval for use before inspection by the Commissioner of Insurance, but no certificate issued by an installer shall be valid for a period longer than one hundred twenty (120) days from date of completion or alteration, repair or installation covered by said certificate. The provisions of this paragraph shall not relieve the dealer, or other person, from the liability of having such installation inspected by the Commissioner of Insurance, as provided in this chapter.

All certificates of approval and permits issued by liquefied gas inspectors under the terms of this section shall be executed in duplicate, and the copy thereof shall be filed and preserved in the office of the State Liquefied Compressed Gas Board for not less than three (3) years from the date thereof.

MISSISSIPPI RULES AND REGULATIONS

LIQUEFIED COMPRESSED GASES

DIVISION 1 TRANSFER OF LIQUIDS

1.1 When a LP-Gas container is used for motor fuel, farm implements, portable containers or similar service and cannot be serviced due to excessive vapor pressure in the fuel container, vapor pressure may be reduced to facilitate fueling by venting to the atmosphere, provided the liquid transfer is located not less than 50 feet from the nearest important building and in an open area without undue hazard to any building or surrounding property and there is no open flame or other source of ignition in the area. Passenger-carrying vehicles shall not be fueled, in this manner, while passengers are on board.

DIVISION II APPLIANCES

2.1 WATER HEATERS

Water heaters, with the exception of those having sealed combustion systems may be installed in bathrooms, bedrooms or any occupied rooms normally kept closed, provided provisions are made for air for proper combustion and circulation.

2.2 ROOM HEATERS

Unvented room heaters may be installed in residential sleeping quarters and bathrooms, provided the aggregate input rating does not exceed 20 btu's per hour per cubic foot of room or space in which it is installed.

2.3 HEATING APPLIANCES IN STATIONARY MOBILE HOMES

Vented or Non-vented type circulating room heaters may be installed in stationary mobile homes for use with LP-Gas as follows:

- 1. The appliance must be listed for use with LP-Gas by the American Gas Association or other nationally recognized testing laboratory.
- 2. The appliance must be installed in accordance with NFPA-54 provisions for combustion and circulating air.
- 3. A clayback heater cannot be used; however a heater with a cool-type cabinet may be used.

DIVISION III OPERATIONS OF LP-GAS TRUCKS IN TRANSPORTING LP-GAS

3.1 Before any person drives a LP-Gas truck with a cargo capacity of less than 5,000 gallon water capacity and makes retail or wholesale tank truck deliveries to consumer, that person shall first take an examination prepared by the L. C. Gas Board to test the knowledge of that persons

qualifications in safe hauling and handling of LP-gas. If the applicant possesses sufficient qualifications, a LP-Gas drivers certificate will be issued. In case of an emergency, a driver can be used for a period not to exceed 15 days without a drivers certificate. The drivers certificate can be cancelled by the L. C. Gas Board for carelessness, drunkenness, negligence, filling illegal or condemned systems, filling unauthorized cylinders from truck, or other good cause. However, before any certificate shall be cancelled the driver and dealer will be given 5 days written notice with reason set forth in the letter for cancellation and shall grant the person holding certificate an opportunity to be heard before the L. C. Gas Board, to show reason, if any, why the certificate should not be cancelled. Upon application to the L. C. Gas Board and upon re-examination of the applicant by the L. C. Gas Board, a new certificate may be issued but no such renewal certificate shall be issued within 60 days of the original certificate.

DIVISION IV NON ADOPTION AND/OR APPLICATION OF STANDARDS

4.1 Section 2-2.6.6 of the 1995 Edition of NFPA-58, "Standard for the Storage and Handling of Liquefied Petroleum Gases," is not adopted by the Mississippi Liquefied Compressed Gas Board; therefore, does not have to be complied with.

I,, have provided, with (Instructor) (Trainee) training that is consistent with NFPA 58 4.4.1 with the scope of their job activities and that includes proper handling and emergency response procedures.
I also understand that their primary duties include transporting LP-Gas, transferring liquid LP-Gas into and out of stationary containers, or making stationary installations; therefore, I have provided training that includes the following components pursuant to NFPA 58 4.4.2:

- 1. Safe work practices
- 2. The health and safety hazards of LP-Gas
- 3. Emergency response procedures
- 4. Supervised, on-the-job training
- 5. An assessment of the person's ability to perform the job duties assigned

MISSISSIPPI DEPARTMENT OF INSURANCE REGULATION 2011-2

HANDLING OF LIQUEFIED COMPRESSED GAS CONTAINERS

TABLE OF CONTENTS

Section 1.	Purpose
Section 2.	Authority
Section 3.	Scope
Section 4.	Requirements
Section 5.	Date of Compliance
Section 6.	Violations and Penalties
Section 7.	Severability
Section 8.	Effective Date

Section 1. Purpose

The purpose of this Regulation is to set forth minimum standards for the use and handling of ASME liquefied petroleum gas containers by liquefied petroleum/compressed gas dealers:

Section 2. Authority

This Regulation is promulgated by the Liquefied Compressed Gas Board with the approval of the Commissioner of Insurance, pursuant to Miss. Code Ann. §75-57-105 (Rev. 2000), as well as the provision of the Mississippi Department of Insurance Regulation No. 88-101, said Regulation being the Rules of Practice and Procedure before the Mississippi Insurance Department.

Section 3. Scope

This Regulation shall apply to all liquefied petroleum gas dealers, their agents and employees.

Section 4. Requirements

A. In order to promote the public safety by avoiding the contamination of ASME containers and by assuring the proper reconditioning of service valves and containers, all dealers shall be required to mark, label, or otherwise designate liquefied petroleum gas containers in such a manner as to easily identify such containers as being owned by the particular dealer. No dealer shall sell, install, fill, refill, deliver or permit to be delivered, or use in any manner any ASME liquefied petroleum gas container unless such container is owned by such dealer or its use is authorized by the owner of such container.

- B. No liquefied petroleum gas dealer, including its agents and employees, may dismantle, disconnect, evacuate, repair, deface, fill, or refill a container belonging to another dealer unless:
 - Prior written permission shall have been granted by the dealer who owns the container;
 - 2. Prior written permission shall have been granted by the owner or lessee of the premises where the container is located, except the owner or lessee may not grant permission to fill or refill a container;
 - 3. The action is taken at the discretion of the authority having jurisdiction as defined in NFPA Pamphlet 58; or
 - 4. The action is taken under a declared state of emergency.

Il Auda ing

- C. Nothing in this section shall be construed as abrogating the right of the consumer to terminate a rental contract on a container with the dealer/owner, in accordance with the terms and provisions of said rental contract.
- D. Containers are to be appropriately marked and easily identified to the inspector.

Section 5. Date of Compliance

All liquefied petroleum gas dealers, their agents and employees shall comply with this Regulation from and after the Effective Date of this regulation, as set forth in Section 8, below.

Section 6. Violations and Penalties

Failure of a liquefied petroleum gas dealer, his agents and employees to comply with the provisions of this regulation shall be considered a violation of Miss. Code Ann. §§75-57-107 and 75-57-109, and may result in a monetary penalty and/or revocation of the dealer's liquefied compressed gas permit.

Section 7. Severability

If any section or portion of a section of this Regulation or the application thereof is held by a court to be invalid, such invalidity shall not affect any other provision of that section or application of the Regulation which can be given effect without the invalid provision or application, and to this end the provisions of the Regulation are declared to be severable.

Section 8. Effective Date

The Effective Date of this Regulation shall be thirty (30) days from the filing for final adoption with the Secretary of State.

READ THE FOLLOWING IT IS THE LAW UNDER WHICH YOU OPERATE

Any person who shall fill any container or system unless the installation, alteration, extension, connection, and repairs are done by a qualified installer or without a current 120-day approval tag or State Inspector approval can be fined a maximum of \$5,000.

Is it fully understood that your LP-Gas certificate can be revoked for any of the following reasons?

Drunkenness, carelessness, filling illegal systems, filling condemned tanks, filling illegal cylinders from trucks, etc.

ALSO

All installations of LP Gas piping, appliances, tanks, etc. <u>must be reported to the L. C. Gas Division</u> <u>within 15 days.</u>

This certificate is valid only while cardholder is employed by company named on card and only while performing work for said company. Termination of employment from this company automatically cancels this certificate. Certificate may be transferred to another company licensed to operate in the State of Mississippi, provided request is made by qualified company.

APPLICANT MUST HAVE VALID COMMERCIAL DRIVER LICENSE WITH APPROPRIATE ENDORSEMENT. <u>A COPY OF CDL MUST BE ATTACHED</u>.

I HAVE READ AND I UNDERSTAND THE ABOVE STATEMENT

APPLICANT'S SIGNATURE	

<u>Information for service work needed to complete Installation report</u>

11111 Road xxx (use an address in your area to complete form)

Jackson MS

This is a customer your company piped and installed tank a year earlier.

- Customer would like a 500-gallon tank installed (customer has a 120 gallon tank now)
- Customer said there is two regulators now (1 red one on tank and a brown one at the house)
- Yard line was done with ½ inch Poly pipe
- House was piped with ¾ inch CSST
- Tie generator into system
- Customer has a room heater, stove, water heater, dryer, and one outlet capped.

MISSISSIPPI LIQUEFIED COMPRESSED GAS DIVISION

Report of Installation, replacement, and/or repair of liquefied compressed gas system, containers, equipment or appliances.
