March 14, 2022

Good morning,

With budget cuts, personnel shortage, and rising gas prices, Consumer safety remains the State Fire Marshal LC Gas Division's top priority.

Starting immediately the LC Gas Division will require photos of each **tank installation** and **generator installation**. The photo should show the area from the tank to the house or generator. Service people should take this photo and name it the customer's last name and address (Example: Smith1234AnywhereStreet).

Specific items the LC Gas Division is looking for, which must be visible in the picture(s), are:

- Regulator installed correctly on tank
- Proper protection was used if copper was used
- Dielectric union was used if needed
- Regulators were vented properly
- Yard lines are stationary going to the generator
- When penetrating a wall, it was sleeved properly

We thank each one of you for your past and present cooperation.

Scottie Cuevas  
Director, LC Gas Division
